Comments 300

- 154,850,498 I am 68 years old so who knows how long my life cycle will be plus I would like to be able to enjoy retirement without being tied down for a long period. Today, 12:40AM
- 154,843,821 Due to the flare/remission nature of the disease I don't believe 1 m would be long enough, over 12 months you have more scope to study various stages of the disease as it flares up or subsides. Yesterday, 5:42PM
- 154,813,959 It may take time for the medication to show results Friday, May 20th 9:30PM
- 154,768,560 I would do whatever it takes to get UC under control Friday, May 20th 4:14AM
- 154,742,898 Would need to know the actual commitment in terms of appointments etc Thursday, May 19th 4:08PM
- 154,704,675 I would hope that a good study would take under a year. Thursday, May 19th 6:44AM
- 154,686,772 Would want it to work by 6 months. Wednesday, May 18th 11:09PM
- 154,668,282 I just want to find a good drug that works Wednesday, May 18th 4:29PM
- 154,660,393 Time is crucial when determining if a certain treatment is effective. To me, More Time = Better Information Wednesday, May 18th 2:19PM
- 154,651,199 ? Wednesday, May 18th 12:00PM
- 154,626,294 I think this is a fair time to obtain results without disrupting someone else life Wednesday, May 18th 6:55AM
- 154,623,708 That is sufficient timing Wednesday, May 18th 6:13AM
- 154,614,828 depends how much the clinical trial disrupts everyday life, if it does then i think 1-3 months would probably be ok Wednesday, May 18th 3:13AM

 154,605,383	I have worked in the medical profession for many years and understand that clinical trials take time to produce results.	Tuesday, May 17th 10:54PM
 154,603,970	I'd like to see long-term effects of the trial.	Tuesday, May 17th 10:17PM
 154,599,919	I think this is an appropriate time frame to gather pertinent data.	Tuesday, May 17th 8:56PM
 154,589,409	I have had UC for 9 yrs. Although the medication had kept me in remission, the cost of the drug concerns me. Even with a prescription plan I pay an exorbitant amount and in retirement that can be an issue.	Tuesday, May 17th 6:01PM
 154,583,448	sometimes testing of new treatments takes time and perseverance	Tuesday, May 17th 4:35PM
 154,581,571	I understand that it takes time for some medications to work properly	Tuesday, May 17th 12:12PM
 154,580,232	I'm pretty flexible in with my work hours.	Tuesday, May 17th 3:59PM
 154,566,625	Just think it would be enough time to tell if something is working or not.	Tuesday, May 17th 1:18PM
 154,562,062	It takes time to see results from some therapies but I would not want to be locked in to a trial for any longer than this.	Tuesday, May 17th 12:24PM
 154,546,031	i have a full time job	Tuesday, May 17th 9:16AM
 154,534,320	i do feel its reasonable period to check whether body is responding to treatment, its a given that each patient responds differenly to treatment	Tuesday, May 17th 6:12AM
 154,530,887	I think 3 to 6 months is a good period of time for myself to see how effective or ineffective the trial would. If things were positive I would consider participating for longer.	Monday, May 16th 5:50PM
 154,530,520	You will know if your body excepts or rejects the treatment	Tuesday, May 17th 4:54AM
 154,530,121	I did a fecal transplant trial took 6 months I got 11 months remission it was worth it.	Tuesday, May 17th 4:46AM
 154,530,120	I realize it can take a lot of time to understand all aspects of a clinical trial, and I would rather dosage of a new product be low and long versus high and complicating/debilitating	Tuesday, May 17th 4:50AM
 154,525,949	Any trial to have some success I believe 3to6 months is a reasonable time.	Tuesday, May 17th 3:16AM
 154,523,843	To see long term effects of trial	Tuesday, May 17th 2:30AM
 154,522,972	Work commitments	Tuesday, May 17th 2:02AM
 154,522,747	Long enough to get some useful data/results but not unending.	Tuesday, May 17th 1:52AM
 154,514,923	I feel that is sufficient time to see results of some sort.	Monday, May 16th 8:52PM
 	I would do whatever it takes to try to help find a cure or a better way to manager UC.	Monday, May 16th 8:38PM

154,514,314			
154,511,098		Although I wouldn't want to be tied down to a clinical trial for this long, I would do it if it meant help for people with UC.	Monday, May 16th 7:28PM
154,509,045		I am a retired professor and believe in research, so I'd do what I could.	Monday, May 16th 6:39PM
154,507,640		The time frame would depend on how many days a week, hours per day, etc. I really didn't know what to answer what time trail to choose. Also depends on how far away.	Monday, May 16th 5:56PM
154,506,592		It really depends on how often I need to go somewhere and where that place is. I'm just busy.	Monday, May 16th 5:44PM
154,504,052		Seems reasonable as it takes time to stabilize on some of the medications.	Monday, May 16th 4:45PM
154,503,636		Because it's a trail, it needs time to see if it will work or not. Cutting short will possibly mean you've cut the effectiveness short.	Monday, May 16th 4:26PM
154,503,031		Incase of side effects or inconveniency.	Monday, May 16th 4:14PM
154,501,917		For a true reading a longer period would be needed	Monday, May 16th 3:46PM
154,501,449		Because finding cures for UC are worth the time spent doing clinical .	Monday, May 16th 3:34PM
154,501,213		I feel that +- 12 months should be enough time for the test to reach a conclusion.	Monday, May 16th 3:16PM
154,500,558		because they can be time consuming and the traveling can be hard.	Monday, May 16th 3:03PM
154,498,077		Because if the trial requires hospital attendance and time commitment then I might find it difficult to participate for more than 6 months.	Monday, May 16th 2:14PM
154,496,050		a cute is worth any time commitment	Monday, May 16th 12:02PM
154,493,381		This is something I have to learn to control so I would be willing to do whatever it takes to keep my flare ups from occurring.	Monday, May 16th 12:48PM
154,492,224		Seems like a reasonable amount of time to give a new drug a chance	Monday, May 16th 12:28PM
154,492,007		If the clinical trial is going well then time isnt an issue	Monday, May 16th 12:20PM
154,490,124		Seems like a good timeframe for trial	Monday, May 16th 11:42AM
154,489,934		I need to understand how to control it	Monday, May 16th 11:37AM
154,487,534		It could become tedious & too time consuming if continuing for longer. Of course it depends what the trial was & how long was necessary for valid results.	Monday, May 16th 10:43AM
		Because I am tired of being sick and I know medications don't work overnight. or if a placebo. at all.	Monday, May 16th

154,483,306		9:37AM
154,482,321	<p>It seems to be there are many different options to eradicate/decrease the symptoms of UC and too many doctors are unsure of available possible cures until you ask them.</p> <p>So for any trial to be worthwhile i think there many different options to try before you come to the one that works for you.</p> <p>Is it diet or tablets or a combination of both which may work for you but not for others so this takes time for your body to react or not react depending on the treatment being used.</p>	Monday, May 16th 9:12AM
154,479,891	<p>It depends on the treatment schdule. If the meds or treatments are on a monthly schedule, 12 months should do it. If it's a daily or weekly dose, 3 to 6 months should be enough. I participated in a 3 month trial for a psoriasis medication (another crappy disease) which I had to use twice a day, every day.</p>	Monday, May 16th 7:16AM
154,479,689	<p>It often takes a while to see some results, I would be willing to wait this long and if the results were positive I would give the clinical trial still more time.</p>	Monday, May 16th 8:36AM
154,479,275	<p>Don't know if I would be able to go longer than 6 mos. on any medication or diet other than what I am on currently.</p>	Monday, May 16th 8:31AM
154,478,088	<p>It would depend on how high my level of involvement would need to be, but I would be willing to invest a lot of time in a trial if I thought it could advance us all towards a cure or at least better treatment.</p>	Monday, May 16th 8:11AM
154,477,180	<p>To give the trial long enough to make a difference.</p>	Monday, May 16th 7:54AM
154,475,914	<p>Should be an adequate amount of time to find out if healing is taking place or not</p>	Monday, May 16th 7:16AM
154,475,899	<p>Anything to help find a cure.</p>	Monday, May 16th 7:22AM
154,475,688	<p>I will try to find if this can help me understand me n my uc ,if in any way it can help me treat it more better way.</p>	Monday, May 16th 7:20AM
15	<p>My daughter suffers from UC and I know she'd do what ever it takes to help get closer to a cure</p>	Monday, May 16th 7:15AM
52	<p>i am unemployed so I have some time to give, but I can't risk my flare to worsen and I can probably get it back on track within this time frame if a trial fails.</p>	Monday, May 16th 7:02AM
154,474,824		
154,474,772	<p>College</p>	Monday, May 16th 7:04AM
154,474,360	<p>Depending on side effects, I might even do a longer time period. A longer time period could result in positive research and or a possible cure.</p>	Monday, May 16th 6:50AM
154,473,703	<p>I'm a full time college student.</p>	Monday, May 16th 2:04AM
154,472,391	<p>With infusion type medication this is about the amount of time it takes to see if there will be a result/improvement</p>	Monday, May 16th 6:02AM
154,471,498	<p>I'll do anything to help. This disease is terrible and I would not wish it in my worst enemy.</p>	Monday, May 16th 5:38AM
154,469,497	<p>I think 2 years would be long enough to show results</p>	Monday, May 16th 4:39AM
154,469,390	<p>I wouldnt want this to be long term</p>	Monday, May 16th 4:36AM
	<p>If taking a med for that time period and it is not working for me 6-12 months would be long enough</p>	Monday, May 16th

154,469,089	 If taking a med for that time period and it's not working for me....12 months would be long enough	4:22AM
154,468,025	 I need to be cured	Monday, May 16th 3:50AM
154,466,191	 Some symptoms need to be picked up and treated which can take more than 6 months.	Monday, May 16th 2:47AM
154,465,689	 I need as much info as I can get	Monday, May 16th 2:16AM
154,464,597	 Longer than 24 months is more of a commitment than I would like to make....particularly if the trial goes pear-shaped	Monday, May 16th 1:41AM
154,463,871	 work commitments	Monday, May 16th 1:02AM
154,463,265	 I don't have a fixed period. If there are good arguments lengthy studies will be fine.	Monday, May 16th 1:03AM
15 62 154,463,265	 Drugs if effective, produce a remission or near remission within 3 months	Monday, May 16th 12:27AM
154,462,699	 If not working by 12 months, unlikely to at all	Monday, May 16th 12:03AM
154,462,416	 length of time should give reliable results	Sunday, May 15th 11:44PM
154,462,406	 If I do not see improvement/remission in 6 months, there are no bets that 12 months would do any better.	Sunday, May 15th 11:38PM
154,462,071	 A good trial takes some time and I am willing to help.	Sunday, May 15th 11:27PM
154,461,994	 This is the max time I could be reliable and true to the study	Sunday, May 15th 11:23PM
154,461,878	 If it will help cure or alleviate UC why not!	Sunday, May 15th 11:17PM
154,461,621	 Even with UC, I lead a very busy life & usually overbook myself. In addition, I'm a cancer survivor so I'd like to continue doing as much as possible with my life :-)	Sunday, May 15th 11:03PM
154,461,416	 I still have to continue to work regular job and pay bills. My family depends on me to continue to work for now.	Sunday, May 15th 10:45PM
154,461,283	 if it can help myself and others living with UC, I think it would be worth it to participate in a lengthy trial.	Sunday, May 15th 10:39PM
154,461,172	 After 4 years with UC....one is willing to give it a reasonable period to show a positive sign.	Sunday, May 15th 10:30PM
154,460,742	 I would want to know that clinicians would be following up on an intervention for a long time.	Sunday, May 15th 9:56PM
154,460,733	 Long enough to see if it works.	Sunday, May 15th 10:07PM
154,459,868	 I think one year should be enough especially if you are on a placebo	Sunday, May 15th 9:45PM

	Depends on the frequency and duration during that time period. A day at the beginning and end, an hour 3 days a week for testing and blogging is about all I can afford.	Sunday, May 15th 9:30PM
154,459,859		
	I don't think 1-6 months is enough time to see if a drug is successful.	Sunday, May 15th 9:39PM
154,459,811		
	I would hope that 1 year would be long enough to figure if it was working, helping, or nothing.	Sunday, May 15th 9:25PM
154,459,665		
	If the clinical trial was successful in treating the UC, then of course anyone would be willing to participate as long as necessary. If, however, the trial is taking a toll on someone's disease and making symptoms worse, you can bet one would be out much, much sooner.	Sunday, May 15th 9:00PM
154,459,240		
	If the trial is helpful, I would participate for as long as it takes.	Sunday, May 15th 9:05PM
154,459,203		
	I know that it takes time for our bodies to adapt to the changes, but I would not want to risk negative side effects for too long.	Sunday, May 15th 8:58PM
154,459,025		
	I just think it may be too much if it were longer.	Sunday, May 15th 8:51PM
154,459,010		
	Depending where you were in a remission or a flare. I had my colon removed. It's been over two years and there are still issues.	Sunday, May 15th 8:44PM
154,458,861		
	I guess it depends what is all involved so difficult to say whether or not I'd extend that time	Sunday, May 15th 8:34PM
154,458,619		
	If I am given a placebo during the trial period I would not want to delay getting medication if necessary any longer than that time frame.	Sunday, May 15th 8:26PM
154,458,448		
	New ideas and advice is always helpful.	Sunday, May 15th 8:22PM
154,458,348		
	Really not sure, new to this	Sunday, May 15th 8:10PM
154,458,163		
	I have lots of responsibilities.	Sunday, May 15th 8:12PM
154,458,107		
	It takes time to figure UC out	Sunday, May 15th 8:09PM
154,458,034		
	Afraid of getting another flare up	Sunday, May 15th 8:07PM
15		
	It takes time to do the clinical trials.	Sunday, May 15th 7:49PM
18		
154,457,771		
	Any answers or new ideas for remission would be great. No one can pin point what caused this terrible life changing disease, the more people that are surveyed the closer we get!	Sunday, May 15th 7:45PM
154,457,541		
	We all have lives to live i'am like most busy living even with U C	Sunday, May 15th 7:27PM
154,457,157		
	My case is mild but it's scary and I'd love to be able to help others.	Sunday, May 15th 7:27PM
154,457,036		
	I work 60-70 hours/week.	Sunday, May 15th 7:24PM
154,456,990		
	Trials can take a while to complete. May need to be involved for a longer period of time	Sunday, May 15th

154,456,876	Trials can take a while to complete. May need to be involved for a longer period of time.	7:11PM
154,456,867	Would depend what I was required to do as the participant.	Sunday, May 15th 7:17PM
154,456,353	If longer trials improve the potential outcome for IBD sufferers than I'm willing to participate.	Sunday, May 15th 6:43PM
154,456,287	UC, as a disease, can fluctuate regarding symptoms and severity over time. To get a good read on how and if a new medication is working, I would expect a fairly lengthy trial.	Sunday, May 15th 6:45PM
154,456,189	I have been on a trial for a drug for cholesterol treatment which was over 2 years. As long as the professionals and I agree that NO HARM is being done I will see it through until the trials are over.	Sunday, May 15th 6:36PM
154,456,094	I believe if we were able to land men on the moon, and we were to put our resources into something that really matters such as UC, the 6-12 timeslot ought to be enough. To much money is directed to people making big bucks on the backs of people suffering from all sorts of maladies, namely UC.	Sunday, May 15th 6:29PM
154,456,092	Trials can take considerable time	Sunday, May 15th 5:56PM
154,456,001	If the trial wasn't working for me I would not want a longer term commitment	Sunday, May 15th 6:31PM
154,455,895	3 months is usually when you notice an improvement on medication, 6 months you should feel improved. I feel this is the	Sunday, May 15th 6:23PM
154,455,846	Research takes time and I would be willing to help out whatever the period of time so that enough data can be collected	Sunday, May 15th 6:19PM
154,455,784	It would depend on my own personal timeline and the study itself. Some studies ask that you refrain from getting pregnant while in the study. I have plans to have another child and I don't want a 2 yr long study to hold me back.	Sunday, May 15th 6:17PM
154,455,626	Don't have much spare time	Sunday, May 15th 6:05PM
154,455,225	if it isnt working, I want to stop	Sunday, May 15th 5:46PM
154,455,119	My daughter is in one now at the university of Chicago. They just get samples during a colonoscopy once a year and interview her. Tracking treatments and results over years.	Sunday, May 15th 5:39PM
154,454,539	If the medication is not working for me, I wouldn't want to go the distance, especially if they would expect me to go a year and I already know I'd it works or not by month 3.	Sunday, May 15th 5:10PM
154,454,142	I have very bad crohns / colitis and would do anything to help find a cure	Sunday, May 15th 4:56PM
154,454,096	I would participate as long as I did not have an allergic reaction to the trial medication.	Sunday, May 15th 4:58PM
154,454,031	If of no benefit before 12 months then it should be discontinued. If however results are promising then maybe continue tests up to 24 months to see if benefits last.	Sunday, May 15th 4:51PM
154,454,005	Depends on the trial, what kind it is and how promising the results would be to solve the UC dilemma	Sunday, May 15th 4:57PM
154,453,965	It would depend on how much of my time per day would be required	Sunday, May 15th 4:55PM

 154,453,777	If it would help to find a cure for all who suffer, I would participate for a long time.	Sunday, May 15th 4:50PM
 154,453,473	As long as needed if my uc was going into remission	Sunday, May 15th 4:29PM
 154,452,963	Not sure	Sunday, May 15th 4:27PM
 154,452,733	If it has not helped in 3 months. I feel it will not.	Sunday, May 15th 4:17PM
 154,452,732	I have ulcerative colitis from last 7 years and	Sunday, May 15th 4:18PM
 154,452,631	We need answers	Sunday, May 15th 4:13PM
 154,452,300	I think a year is enough time to tell if something works or not	Sunday, May 15th 3:59PM
 154,451,888	I'm scared for the future and need help!	Sunday, May 15th 3:49PM
 154,451,853	Not really sure as most clinical trial take quite a while to evaluate the data. Also depends on the commitment level required.	Sunday, May 15th 3:44PM
 154,451,792	If the trial was not too time invasive and needed to last this long	Sunday, May 15th 3:48PM
 154,451,725	I can understand that you really can't start to see turn around for about 3-4 mo, but there has to be a pull out time period around 6 mo if you are seeing no results IF you have SEVERE COLITIS. Your life can't afford to go much further down the line of potentially receiving a placebo.	Sunday, May 15th 3:46PM
 154,451,717	Better information gained	Sunday, May 15th 3:45PM
 154,451,503	I presently work full time and wouldn't have much time to commit.	Sunday, May 15th 3:35PM
 154,451,368	I am afraid that some clinical trials will require long periods of time with changing of medications. Longer than a 3-6 month commitment could be tough to sign up for since I would be taking a big risk dropping my current drugs. I don't think I'd be willing to take a risk that could make me sick again for longer than 3-6 months.	Sunday, May 15th 3:33PM
 154,451,263	Long enough	Sunday, May 15th 3:29PM
 154,451,253	Not sure of what would be involved.	Sunday, May 15th 3:29PM
 154,451,023	A year should be plenty of time	Sunday, May 15th 3:19PM
 154,450,939	It would depend on the level of involvement. The more intensive and demanding it is the harder it would be to commit to a longer time frame.	Sunday, May 15th 3:13PM
 154,450,880	I think that is sufficient time	Sunday, May 15th 3:10PM

 154,450,871	I was in a trial once before as my colitis became worse. Not sure if mine was placebo or the real thing. I would want the real treatment in a closer amount of time.	Sunday, May 15th 3:12PM
 154,450,850	I would hope to see a result in this time	Sunday, May 15th 3:13PM
 154,450,792	Depends on what the trial involved	Sunday, May 15th 3:10PM
 154,450,706	If it was going to take more than half a year of uncertainty I'm not sure if it would be worth it.	Sunday, May 15th 3:02PM
 154,450,547	.	Sunday, May 15th 2:57PM
 154,450,527	In my experience it can take a while to see your body's response, this amount of time is plenty to get the idea of how you're reacting. That said, if you're getting sicker/in an uncontrolled flare, I'd drop out for a treatment that works if the trial wasn't working within several months bc when I flare it's usually about 3-4 months time that it can get super out of control and need hospitalization.	Sunday, May 15th 2:48PM
 154,450,515	depending on product would depend how long I stayed on trial and what if anything I may have to give up	Sunday, May 15th 2:55PM
 154,450,466	It really depends on how much input on my part is involved.	Sunday, May 15th 2:55PM
 154,450,399	Would probably involve travelling long distances	Sunday, May 15th 2:53PM
 154,450,303	Fair time to get a result	Sunday, May 15th 2:42PM
 154,450,297	It might not agree with me	Sunday, May 15th 2:48PM
 15 65	If it wasn't working, then I wouldn't want to continue it. I think this would be enough time to see if it was working.	Sunday, May 15th 2:42PM
 154,449,953	I have other chronic diseases requiring daily management, and a clinical trial is yet another thing to add to my already full plate of stuff	Sunday, May 15th 2:32PM
 154,449,925	Not too short and not too long.	Sunday, May 15th 2:27PM
 154,449,875	Seems like a reasonable time	Sunday, May 15th 2:33PM
 154,449,243	Depends what the trial entailed. Wouldn't want it to interfere with other aspects of my life for too long.	Sunday, May 15th 2:14PM
 154,449,040	I have considered taking part in a trial for a new biologic which requires commitment of 2 years. As other medications had stopped working for me, I would be willing to try something new that is only available through clinical trial, if there was a possibility it might work, even if it required long term commitment.	Sunday, May 15th 2:08PM
 154,448,937	Doesn't matter?	Sunday, May 15th 2:08PM
 154,448,633	We want to travel once in a while.	Sunday, May 15th 1:54PM
 154,448,087	My Colitis spans these periods , Just have another Flare up , It's in its second month	Sunday, May 15th 1:29PM

 154,448,075	fed up allready	Sunday, May 15th 1:11PM
 154,448,056	Not sure as I have never had the opportunity and definitely don't know what is considered enough time, too much time or too little time.	Sunday, May 15th 1:35PM
 154,448,020	Would hope to see results or not in that amount of time.	Sunday, May 15th 1:34PM
 154,447,894	my disease is crohns disease. A result is diffult to interpret as beneficial unless follod up for 1.5 to 2 yes.	Sunday, May 15th 1:26PM
 154,447,563	Helping them hopefully helps me and all the others like me.	Sunday, May 15th 1:12PM
 154,447,509	Feel I might not complete trial if longer.	Sunday, May 15th 1:08PM
 154,447,494	In case it affects long term health	Sunday, May 15th 1:12PM
 154,447,031	I have to maintain a job and already have a "full plate" of responsibilities that cannot be interfered with.	Sunday, May 15th 12:59PM
 154,446,797	If it can help others who are suffering its worth the time.	Sunday, May 15th 12:53PM
 154,446,724	1 month is long enough	Sunday, May 15th 12:53PM
 154,446,678	It's the most important part of the research!	Sunday, May 15th 12:49PM
 154,446,465	Depends on how bad the side affects are and how much it restricts me from doing what I want to do.	Sunday, May 15th 12:36PM
 154,445,907	I am still trying to be a healthy retiree and travel a lot. Much more over 6 months would interfere in my travel plans, plus I am pretty nervous about taking something for an extended amount of time.	Sunday, May 15th 12:26PM
 154,445,847	if it works	Sunday, May 15th 12:25PM
 154,445,564	it takes time for something to work....you have to give your body time to accept the new trial	Sunday, May 15th 12:15PM
 154,445,516	I would like to think that within six months there would either be a positive change or no change at all. Most medications required one to two months to begin having any effects.	Sunday, May 15th 12:10PM
 154,445,413	I feel that's a sufficient amount of time to get accurate data.	Sunday, May 15th 12:06PM
 154,445,250	Don't know orbit have the patience to continue if it is not working.	Sunday, May 15th 12:05PM
 154,444,888	I'm in a trial right now. Gonna last for a year.	Sunday, May 15th 11:53AM
 154,444,824	Not sure seemed like a good amount of time.	Sunday, May 15th 11:53AM

Sunday, May 15th

	If I was in a flare and needing help, I would want to see results in a reasonable time frame.	11:40AM
15  11 154,444,402	Would need extended period of time to gather info due to the eb and flow of uc.	Sunday, May 15th 11:32AM
	Will do anything for science	Sunday, May 15th 11:39AM
154,444,365		
	Because I would do it if necessary to get some solution	Sunday, May 15th 11:39AM
154,444,355		
	I varies on type of study. Is it done at home and monitored with help as needed. How often do I need to go in for tests. I want to get rid of it and I want to help cure it for all.	Sunday, May 15th 11:33AM
154,444,286		
	Time and results	Sunday, May 15th 11:31AM
154,443,989		
	If it helps to find a cure then it is beneficial no matter how long the trial.As it stands now,I assume I have UC for life.	Sunday, May 15th 11:28AM
154,443,781		
	If any positive results are gained one year should be adequate to see some results.	Sunday, May 15th 11:23AM
154,443,596		
	Any amount of time to try and find a solution	Sunday, May 15th 11:18AM
154,443,583		
	I would be willing to participate for the longest period of time if I could do it by email or mail or phone. Going to a facility is not easily accomplished for a long period of time. I am also in Women's Health Initiative longitudinal study of cocoa.	Sunday, May 15th 11:18AM
154,443,542		
	1-2 years seems like a reasonable soak period to have the medicine react, and monitor effects while gong thru seasonal influences (holidays, stress, weather, activity, etc)	Sunday, May 15th 11:13AM
154,443,495		
	It takes time to get drugs to work. I am on entyvio and have been told it takes up to 1 year to get into some remission.	Sunday, May 15th 11:13AM
154,443,445		
	I think a month is reasonable time frame for subjects to to tested without it being a actual deficit or hassle for them. However, personal I'll be willing to go longer duration dependng on the test.	Sunday, May 15th 11:11AM
154,443,374		
	Maybe it would take this long to see how stable the results are since UC is a disease that can have remissions.	Sunday, May 15th 11:09AM
154,443,305		
	Depends on symptoms	Sunday, May 15th 11:15AM
154,443,270		
	I think this is the right time	Sunday, May 15th 11:13AM
154,443,258		
	Anything less is hard to classify as being successful or not. UC can have short time periods where it seems it is "getting better" but it is not.	Sunday, May 15th 11:10AM
154,443,092		
	If it became clear that the trial wasn't working for me, I wouldn't want a longer commitment.	Sunday, May 15th 11:09AM
154,443,070		
	Depending on the time that needed to be put in or if I had to take drugs but length of time in a study wouldn't bother me	Sunday, May 15th 11:01AM
154,442,874		
	I think once your 'in a groove' that a time commitment becomes your norm it won't feel such a burden maybe?!	Sunday, May 15th 10:57AM
154,442,869		
	I've noticed it takes a while for the body to heal and to change life style changes at my age - in my 60's	Sunday, May 15th 10:55AM

154,442,837		10:45AM
	Interested to help find a cure	Sunday, May 15th 11:00AM
154,442,823		
	Some studies need to see the long term effects. I'd much rather have something thoroughly tested before it becomes a recommendation for lots of people.	Sunday, May 15th 10:47AM
154,442,797		
	I wuld like to see if there is a positive impact during this time frame, but would be willing to do yearly or semi-yearly followups beyond this time frame.	Sunday, May 15th 10:44AM
154,442,685		
	I think a year would be enough time to see real results	Sunday, May 15th 10:50AM
154,442,671		
	So they can find something to cure this ugly thing.	Sunday, May 15th 10:50AM
154,442,660		
	I want to do what I can to find a cure.	Sunday, May 15th 10:45AM
154,442,457		
	Because of my commitment towards my business	Sunday, May 15th 10:45AM
154,442,451		
	Feel that is a reasonable amount of time.	Sunday, May 15th 10:44AM
154,442,416		
	I just think I would have an expiration date on the time commitment. Of course, it would depend on a number of factors in what would be expected of me in a trial.	Sunday, May 15th 10:41AM
154,442,393		
	That's all I have time for	Sunday, May 15th 10:44AM
154,442,376		
	Long period needed to see an improvement in disease	Sunday, May 15th 10:40AM
154,442,365		
	I feel 2yrs. would be long enough to see results.	Sunday, May 15th 10:34AM
154,442,272		
	Time vested to make sure results of something new are better understood about it results and effectiveness.	Sunday, May 15th 10:23AM
154,442,212		
	I just don't think I would like to participate much longer than a month. I don't know what I would have to take. I am in pretty good shape right now and wouldn't want to feel worse with experimental drugs.	Sunday, May 15th 10:23AM
154,442,155		
	I would reasonably do what it took to find a positive result. This would be subject to ongoing progressive results.	Sunday, May 15th 10:32AM
154,442,142		
	2 years is a long time.	Sunday, May 15th 10:35AM
154,442,125		
	Need plenty of time to see results.	Sunday, May 15th 10:25AM
154,441,929		
	If it would have the chance to help others I'm all in	Sunday, May 15th 10:25AM
154,441,900		
	Medications need time to be evaluated.	Sunday, May 15th 10:25AM
154,441,869		
	I have no much time.	Sunday, May 15th 9:38AM
154,441,810		

 154,441,760	I would want whomever is testing a drug I might use in the future to be committed to a year or so of providing feedback/data for the trial. Therefore, that is the time I am willing to give as well.	Sunday, May 15th 10:23AM
 154,441,731	studies take time.	Sunday, May 15th 10:23AM
 154,441,614	If there was a possibility for a cure at the end I would help out as much as possible	Sunday, May 15th 10:18AM
 154,441,543	I am very interested in helping medical science solve UC. I think there needs to be more awareness and studies to help find cures.	Sunday, May 15th 10:11AM
 154,441,515	IF ITS GONNA WORK IT SHOULD DO SO WITHIN A MONTH OR SO. I WANT QUICK RELIEF OF PAIN ETC. IN OTHER WORDS I HAVE NO PATIENCE.	Sunday, May 15th 10:11AM
 154,441,426	So far nothing has worked; in fact, some meds have made my son worse. I know we have to give a fair time allotment, but still don't want to waste time.	Sunday, May 15th 10:11AM
 154,441,245	Some treatments can take longer to start to work	Sunday, May 15th 9:58AM
 154,441,069	I'd do whatever it takes to help cure this dreaded illness. Wish there were more trials!	Sunday, May 15th 10:02AM
 154,441,034	Length needs to be long enough for method to work (or not)	Sunday, May 15th 10:01AM
 154,440,986	A longer time period being enrolled might result in a longer period seeing effects and being symptom free and in remission.	Sunday, May 15th 9:56AM
 154,440,745	I would participate for the length of time estimated for results to be clear or if/until I experienced worsening/debilitating UC symptoms.	Sunday, May 15th 9:53AM
 154,440,650	Within 3 months it should be evident that the drugs are working or not.	Sunday, May 15th 9:48AM
 154,440,568	If it would help find a treatment to help myself and others, the time would be worth it.	Sunday, May 15th 9:48AM
 154,440,564	I would want to contribute as much as possible if required.	Sunday, May 15th 9:46AM
 154,440,548	If it does not work in 3 months, probably not gonna work at all.	Sunday, May 15th 9:48AM
 154,440,543	As long as needed	Sunday, May 15th 9:48AM
 154,440,471	I don't know that I would want to, unless it was a trial for medical marijuana, and then it would be on	Sunday, May 15th 9:39AM
 154,440,461	I have plenty of time and I think the longer the research can go on for the more information can be gleaned, so in the long run this type of information is much more valuable. People with colitis have different symptoms that can change from day to day depending on our mood, what we eat, our surroundings absolutely anything can change our symptoms. So the longer we can do any survey patterns would start to emerge and this would be much more useful for scientific research.	Sunday, May 15th 9:33AM
 154,440,376	Don't want to get bored	Sunday, May 15th 9:45AM

 154,440,367	Some treatments take extended amounts of time to be effective.	Sunday, May 15th 9:45AM
 154,440,292	Anything under a year would not provide enough information	Sunday, May 15th 9:41AM
 154,440,247	If I were to participate in a clinical trial and it wasn't working, I would not want to commit to more than 3 months and have my flare worsen. Time is of the essence when in a flare because they get really bad really fast.	Sunday, May 15th 9:36AM
 154,440,227	It just depends.	Sunday, May 15th 9:41AM
 154,440,184	It seems you should be able to see some change in that amount of time	Sunday, May 15th 9:37AM
 154,440,064	I think at least 6 months required to understand uc	Sunday, May 15th 9:35AM
 154,440,017	I work full time and have two kids. My time is very limited..	Sunday, May 15th 9:35AM
 154,439,921	6-12 months is a reasonable amount of time to determine if the trial medication is effective or not.	Sunday, May 15th 9:27AM
 154,439,762	It would depend greatly on the trial itself, to be honest...	Sunday, May 15th 9:29AM
 154,439,744	It all depends on whether the medications used during the trial worked...if they had unpleasant side effects or were making the issue worse....typically 1-3 months is a good period of time to find out if the trial is effective.	Sunday, May 15th 9:22AM
 154,439,735	I rarely have flares but want to help others. I am also raising grand kids as a single grandma and time is an issue.	Sunday, May 15th 9:27AM
 154,439,734	I'm committed to working on myself and if it takes a year, I would do it	Sunday, May 15th 9:23AM
 154,439,679	The longer the better for best results.	Sunday, May 15th 9:26AM
 154,439,643	As long as it takes as long as the trial is all natural and not harmful and there are NO side effects.	Sunday, May 15th 9:24AM
 154,439,607	I'm very busy but I want to help and don't think a month is long enough	Sunday, May 15th 9:14AM
 154,439,577	IT is too scary to try something different. I do not like medical side effects nor do I want another flare up again.	Sunday, May 15th 9:20AM
 154,439,556	That is all I could handle, especially if I did not see any results.	Sunday, May 15th 9:18AM
 154,439,547	You should see some results within 6 to 12 months.	Sunday, May 15th 9:22AM
 154,439,432	3-6 weeks seems like a reasonable time for a med, diet ect. to work.	Sunday, May 15th 9:09AM
 154,439,419	By 3 months you should be able to see a difference, good or bad.	Sunday, May 15th 9:15AM
 154,439,379	My disease is very active and I'm on my last option before surgery.	Sunday, May 15th 9:16AM

 154,439,364	I think I could not stay focused longer than 6 months	Sunday, May 15th 9:18AM
 154,439,345	Because the patient isn't insured	Sunday, May 15th 9:16AM
 154,439,319	I don't want to be sick anymore and if that is what it takes, I am willing.	Sunday, May 15th 9:13AM
 154,439,317	Since I have never participated in a trial I don't know what to expect	Sunday, May 15th 9:13AM
 154,439,309	I'm on remicade and would like to get off.	Sunday, May 15th 9:17AM
 154,439,307	It really depends on the situation, i.e. weekly time commitment, risks, potential upside of medication, compensation, Etc.	Sunday, May 15th 9:14AM
 154,439,135	As long as I'm not in pain I'd be willing to go longer.	Sunday, May 15th 9:08AM
 154,439,115	Want to make sure trial truly proves it works without any lingering side effects.	Sunday, May 15th 9:08AM
 154,439,065	if they cant figure it out in that in that amount of time. I dont think they will	Sunday, May 15th 8:58AM
 154,439,012	If a treatment is working it would be apparent by this time frame. Why continue a treatment that does not work.	Sunday, May 15th 9:05AM
 154,438,996	If it helps people like me then any time is worth it.	Sunday, May 15th 9:06AM
 154,438,959	Would participate how ever long it might take to benefit those with UC	Sunday, May 15th 9:06AM
 154,438,952	UC needs all the research it can get.	Sunday, May 15th 9:06AM
 154,438,871	Just going over a year with my schedule doesn't suit.	Sunday, May 15th 9:00AM
 154,438,848	Seems a reasonable trial period for a new treatment to show sustainable effects.	Sunday, May 15th 8:57AM
 154,438,845	I feel if something is going to work you should know in 3-6 months.	Sunday, May 15th 8:58AM
 154,438,833	I would not want to be in it onandon. Also to be cominted less would be of no help.	Sunday, May 15th 8:56AM
 154,438,787	Depends on if the clinical trial will fit with my work schedule	Sunday, May 15th 9:01AM
 154,438,664	Because my life is miserable and I want to feel better	Sunday, May 15th 8:57AM
 154,438,651	Might be too much of a commitment.	Sunday, May 15th 8:55AM
	I get frustrated doing anything much more than 6 months	Sunday, May 15th 8:56AM

---

154,438,610

Most treatments take 3 months at least to show complete response

Sunday, May 15th  
8:54AM

154,438,525

If I can avoid having a colectomy I'd try it.

Sunday, May 15th  
8:23AM

154,437,546

UC is a lifelong disease so they may need to see you over a long period of time.

Sunday, May 15th  
8:08AM

154,437,102

Anything that helps understanding and treatment will be worth giving time to.

Sunday, May 15th  
7:16AM

154,434,993

I am willing to give the time needed to ensure that someday this disease no longer exists

Sunday, May 15th  
6:43AM

154,433,851

Should be enough time to see a difference

Sunday, May 15th  
6:44AM

154,433,844
